

## CATTLE MANAGER GREER.

### Attends Cattle Board Meetings—Fixes Tax Levy for Board.

#### PURCHASES ARMENDARIS GRANTS.

W. H. Greer of Deming, manager of the Victorio Land and Cattle company, and a member of the cattle sanitary board, was at Santa Fe yesterday and attended the meeting of that body with Governor Otero, Territorial Treasurer Vaughn and Territorial Auditor Sargent, to fix the tax levy for the maintenance and operation of the board. Mr. Greer came on to this city last night and is here today, continuing south tonight.

An increase of 2 mills was asked and granted which was made necessary by the additional expenses incurred in enforcing the quarantine regulations when an invasion of contagious disease was threatened from the south and Arizona. It was necessary to employ more inspectors at that time to keep the contagion out of New Mexico.

"The board has made a new departure," said Mr. Greer, "in that it has employed Dr. H. F. Spencer, an experienced veterinarian who was formerly a member of the state board of California, and whose services are at the call of cattlemen of New Mexico. He is employed for the purpose of assisting cattlemen in preventing the outbreak or spread of contagious disease among cattle. The cattle of New Mexico were never in a better or healthier condition than now and it is the great desire of the board to keep them so. We hope that all cattlemen will fully realize and appreciate the importance of the services of Dr. Spencer and notify him promptly at Las Vegas of any disease that may break out which they do not clearly understand. He will at once make a personal examination.

"The cattle interest of New Mexico is multiplying so rapidly that it is becoming one of the chief industries of the territory. In view of its great increase, the cattle sanitary board is taking every precaution to preserve the health of the cattle. In this the board is fortunate to have such officers as Colonel E. G. Austen for president and J. A. LaRue for secretary. The former is thoroughly familiar with all the details of the cattle business and knows just what he is about, while Captain LaRue has performed the duties of secretary very efficiently and knows exactly how to meet every situation that may arise. The relations between the cattlemen of the territory and the board and its officers are pleasant and harmonious and the cordial co-operation that exists makes it probable that there will be no trouble with New Mexico cattle.

"The grass in the southwestern part of the territory is abundant and the spring shipments have been heavy. The construction of the fence along the Arizona line made it possible to raise the quarantine and the precautions taken have left the interests in that section in good shape. The indications are that there will be a very heavy movement of cattle to California in the fall and the season, taken as a whole, will be a good one. The cattlemen throughout the territory now appreciate the necessity of getting a maximum quality, instead of quantity in stock and for that reason a very high grade of bulls is being purchased. The stock will be rapidly bred up and New Mexico cattle will be put on a par with any range cattle of the west."

It is learned that the Victorio Land and Cattle company, of which Mr. Greer is general manager, and which has extensive land holdings and great herds of cattle in southeastern Arizona, in Grant and Luna counties in this territory, has about completed negotiations for the purchase of the two Armendaris land grants in Socorro and Sierra counties, and containing 495,000 acres, from the Chicago Cattle company, a corporation which purchased them some years ago from the late Wilson Waddingham. Both grants were made to Pedro Armendaris by the Mexican government in the 30s, are confirmed by congress and patents for them have been issued. The Victorio Land and Cattle company will fence them and place at once 10,000 head upon them. In addition to containing much fine grazing land, these grants are rich in mineral resources and in coal and many portions of them, by the construction of reservoirs and irrigation systems, can and will be reclaimed for agricultural purposes. The famed "Jornado del Muerto" is located in the eastern portion of these grants. It is a magnificent stock range and it is believed that artesian water can be developed on the Jornada. There are numerous springs upon the property, the flow of which can be increased very much and no doubt will be, under the new ownership. An office for the agent in charge will be established at San Mar-

cial in Socorro county and this vast property will be managed from there. It is a princely domain, which needs nothing but water to make it a veritable garden, as the soil on the mesa and in the valleys is of the richest and absolutely virgin. The Rio Grande flows through the western portion of the grants and there are several very fine reservoir sites in the bed of that river within the boundaries of the property. The writer has seen the grass knee deep on the Jornada del Muerto for months at a time and hundreds of tons of the finest gramma hay were cut there in days long gone by to supply the military carriages at Forts Craig, McRae and Selden with this hay.

There is no timber upon the grants but the indications of fine coal are sure and development shows that the vast coal measures are there. With proper management this great domain of a half million acres will in ten years be worth ten times the amount paid for it by the Victorio Land and Cattle company. As a stock range and with its hidden water resources developed, the proposition cannot be beaten anywhere in the great west. Its purchase by the company is certainly a great stroke of business sagacity and far sighted wisdom.

#### Working Night and Day.

The busiest and mightiest little thing that ever was made is Dr. King's New Life Pills. These pills change weakness into strength, listlessness into energy, brain fog into mental power. They're wonderful in building up the health. Only 25c per box. Sold by all druggists.

#### SHOT AT CAT; HIT A MAN.

Otto Werney Receives a Load of Shot Intended for an Animal.

Otto Werney, a young man who is interested in goat raising in the Go'l Hill section, is an inmate of the St. Joseph sanitarium in this city, as the result of a rather peculiar accident. Says the Silver City Independent.

For some time past Mr. Werney's goat herd has been suffering from the depredations of wild cats. As a result, the young man and his herders were on the lookout for the marauders. One night last week the herd had been penned up for the night in the corral. Mr. Werney was awakened by the bleating of a kid, and getting up to investigate, found the young animal caught between the railings of the corral fence. He started to extricate him and in so doing made considerable noise. This awakened a Mexican herder who was sleeping nearby, and who at once jumped at the conclusion that the cats were after the goats again. Without stopping to investigate he let loose a charge of buckshot in the direction of the noise, a considerable portion of which Mr. Werney received in his right leg. The wounds while very severe, were not necessarily dangerous, but Mr. Werney at once came into town for medical attention. He is getting along nicely and will be up and about during the present week.

#### For Over Sixty Years.

An old and well tried remedy. Mrs. Winslow's Soothing Syrup has been used for over sixty years by millions of mothers for their children while teething with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for diarrhoea. Is pleasant to the taste. Sold by druggists in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.

#### Laid at Rest.

The funeral of Mrs. Sarah O. Long, who died on Tuesday night at her home on South Broadway, was held this afternoon at A. Borders' undertaking parlors.

There was a large number of friends in attendance and the floral tributes were many and beautiful. Rev. T. C. Beattie officiated, and the burial was in the Fairview cemetery.

#### The Boss Worm Medicine.

H. P. Kumpke, druggist, Leighton, Ala., writes: "One of my customers had a child, which was sick, and threw up all food, could retain nothing on its stomach. He bought one bottle of White's Cream Vermifuge, and it brought up 110 worms from the child. It's the boss worm medicine in the world." White's Cream Vermifuge is also the children's tonic. It improves their digestion and assimilation of the food, strengthens their nervous system and restores them to the health, vigor and elasticity of spirits natural to childhood. 25c at J. H. O'Reilly & Co.

#### Police Court.

Al Walters was before Judge Crawford this morning. Fire water troubled him yesterday. He'll work for the city ten days.

Another man who was arrested for being drunk forfeited a \$5 bond.

James N. Sanburn, who has been the agent of the Sierra Madre railroad at Juarez, resigned a few days ago to accept the agency of the El Paso & Southwestern road at Bisbee. He will assume his new duties as soon as he can be checked out by the Sierra Madre people.

## GOOD MINING NEWS.

### Concentration Mill to Be Erected at the Snake Mine, Hillsboro.

#### RICH ORE IN THE RICHMOND.

L. W. Galles, the hustling district manager of the State Life Insurance company of Indianapolis, Ind., who is interested in some excellent mines down in Sierra county, is in receipt of information from Hillsboro, which makes him feel jubilant over the future mineral products of that county and assures him that great things, in the near future, may be expected from that section of New Mexico.

His brother, Hon. Nicholas Galles, sends him a drawing of a fifty stamp concentration mill, with separate crushing plant, which will soon be erected in the Snake mine near Hillsboro. The owners of this property are New York capitalists, with ex-United States Senator Warner Miller as president. These gentlemen have other properties besides the Snake mine and they intend to do an immense amount of development work in the next few months.

Some extra good news was received by Mr. Galles in a letter from Mrs. E. E. Pearson, who is the manager of the Richmond group of the Gold Mines company, operating within a few miles of Hillsboro. The lady says she has just opened up some \$300,000 worth of ore on the 200 foot level east, in the Richmond mine, and has four foot of some \$60 per ton ore. Of this rich ore, there is about fifty tons in the dump, and the vein still holds its own in width. Below that level on the 300 foot, also to the east, the drift has been run in 300 feet, and a vein of high grade ore and some two and one-half feet of low grade, running \$18 to the ton, has been encountered.

Mrs. Pearson is quite enthusiastic in her comments about the Hillsboro mining district and says that the prospects are exceedingly bright.

Diphtheria relieved in twenty minutes. Dr. Thomas' Electric Oil. At any drug store.

#### Back from Tennessee.

Mrs. J. G. Albright returned to the city last night from Memphis, Tenn., where her daughter, Miss Claude Albright, is filling a most successful engagement with the Lyceum Opera company. Mrs. Albright was accompanied this far by Col. and Mrs. A. D. Gwynne and Miss Emma Henderson, all of Memphis, who continued west to southern California. Colonel Gwynne is a gentleman of means, a banker of Memphis, and he, with Mrs. Gwynne and Miss Henderson will stop over a day or so in Albuquerque on their return to Memphis. It is quite likely that the colonel will be induced to invest in real estate here.

Hives are a terrible torment to the little folks, and to some older ones. Easily cured. Doan's Ointment never fails. Instant relief, permanent cure. At any drug store, 50 cents.

#### SWEET PEA CONTEST.

J. H. O'Reilly & Co. Award Two Prizes and Both Ladies Are Happy.

The sweet pea contest is over. In the spring J. H. O'Reilly & Co., the enterprising druggists, gave away a lot of sweet pea seed to the ladies of Albuquerque and announced that the lady bringing to their store the biggest and sweetest bouquet of sweet peas would be awarded a nice prize.

Yesterday was the closing day and last evening after looking over the many bunches that had been brought in the company awarded Mrs. H. G. Faber, whose bouquet contained 152 full grown sweet pea blossoms, the first prize, which was a half pound bottle of Paul Reiger's California sweet pea perfume. Miss Dolly Lusted brought in a bouquet of 141 blossoms, and was so close a second to the winner that the druggist awarded her a four ounce bottle of the same perfume. Mrs. G. Parks came in third with 132 blossoms and Mrs. J. L. Clover fourth with 110 blossoms.

A little life may be sacrificed to an hour's delay. Cholera infantum, dysentery, diarrhoea come suddenly. Only safe plan is to have Dr. Fowler's Extract of Wild Strawberry always on hand.

#### WILL RENEW TIMBER.

United States Bureau of Forestry Will Make the Plans.

William H. Bartlett of Chicago has decided to put his 210,000 acre preserve in northern New Mexico on the Maxwell land grant, under forest management, and has asked the bureau of forestry to make a plan for handling the tract. A party of four men under Austin F. Hawes of the Yale forest school, will be occupied during the summer with the work.

The Bartlett tract lies in the Vermejo valley, west of Raton, on one of the spurs of the Rocky mountains, and borders on Colorado in one place. It was formerly part of an old Mexican

land grant. Mr. Bartlett acquired it after the timber rights on nearly all the land had been sold. Lumbering of bull pine, the chief tree, is now going on, but most of the timber rights will expire next year and the owner wants the land to become covered again with a good growth of forest. It will be necessary in order to accomplish this to keep out fires and to improve the natural reproduction of the trees. In cases it may be necessary to plant.

The study will include the preparation of maps showing the topographic features, the types of forest, the irrigation lands, and the lands where reproduction is well advanced. An entomologist will accompany the party to study the harm done the trees by insects.

What's the secret of happy, vigorous health? Simply keeping the bowels, the stomach, the liver and kidneys strong and active. Buckdock Blood Bitters does it.

#### Hahn at Santa Fe.

C. W. Dudson, who has for many years been the agent for the Colorado Fuel and Iron company in this city and has handled the coal trade of the Madrid coal mines here, was informed today by the company's general agent at El Paso, Texas, that the company would sell him no more coal, and that W. H. Hahn, agent at Albuquerque, would hereafter be in charge of the coal situation in this city. Mr. Dudson is at a loss to understand the summary action of the coal company and is investigating the matter before taking further steps in the premises.—New Mexican.

#### Brutally Tortured.

A case came to light that for persistent and unmerciful torture has perhaps never been equaled. Joe Golobick of Colusa, Cal., writes: "For 15 years I endured insufferable pain from rheumatism and nothing relieved me though I tried everything known. I came across Electric Bitters and it's the greatest medicine on earth for that trouble. A few bottles of it completely relieved and cured me." Just as good for liver and kidney troubles and general debility. Only 50c. Satisfaction guaranteed by all druggists.

#### GOLDEN DISTRICT.

Special Correspondence. Golden, N. M., July 2.—W. Wood of Kansas City arrived in town yesterday and will have full charge of the Gold Bullion Mining company affairs.

Miguel Martinez and Donacena Campos were united in the holy bonds of matrimony by Rev. Adrian Rabey, of Guadalupe, of Santa Fe New Mexico.

James Lucas made a run of twenty tons of ore taken out of his mines in the Ortiz mine grant. The values in the ore were good and several more tons will be run soon.

T. P. White has struck some very high grade copper ore in the Gold King mine. The ore will be shipped to the Mary Smelting company of Cerrillos for treatment.

George Adriano spent several hours in Golden yesterday and reports that the McKinley mine is producing some good free gold ore. Several tons of the ore will be sacked and shipped to Golden for treatment.

The Camden Mining company has overhauled the five foot Huntington mill at Golden and are now ready to mill any ore from the camp. The company has started getting out some ore from their mines situated in the Ortiz grant.

#### THE HERLOW WRECK.

Investigation Results in the Dismissal of Four Employees.

The result of the investigation made by the Santa Fe company into the causes of the disastrous wreck at Herlow station has been made public. Conductors J. L. Wisner and Joe Koebel, Engineer Selb, who was at the throttle of Conductor Koebel's train, and the flagman, who carried his flag past Thornton, have been discharged. Conductor Koebel is blamed for following his flag past Thornton, when he had met orders for that station. Conductor Wisner is blamed for carrying the flagman past Thornton. Engineer Selb's responsibility is held to have been equal to that of the conductor of his train, and the flagman is blamed for not insisting on being let off at Thornton. The flagman says he had time only to swing on to the rear end of the train, though carrying a flag. He should have been in the engine. But the investigating committee held that he had full power and that it was his duty to stop the train himself by signaling to the engineer. Engineer Archibald, who was in second No. 2, was able to show that he had received no signal and was quite unaware of the presence on the train of the man with a flag.

It was an unhappy combination of circumstances that led to the disastrous wreck. Without doubt all of the employees let out acted according to their best judgment, and ninety-nine times out of a hundred their actions would have been followed by no serious consequences.

There were two Fourth of July picnics before Judge Crawford this morning.

## FOREST REGULATIONS.

### Objects of the Reserves Have Been Posted Throughout New Mexico.

#### AN IMPORTANT SUBJECT.

Large cloth posters are being placed on the boundaries of the forest reserves in New Mexico and other parts of the United States. There seems to be a notion prevailing among some people in the vicinity of these reserves that the establishment of forest reserves is an imposition upon them. These posters are being put up for the purpose of briefly acquainting any who do not know why forest reserves are established with the reason and briefly describing the benefits of the reserves. The object of the reserves as stated in the posters is:

1. "To protect a growth of timber on land which it not fit to grow other kind of crops.

2. "To keep a growth of vegetation especially timber, on land which would otherwise wash and gully. The timber and other vegetation protects the ground against this washing and thus it does two things: It prevents the rain and snow waters from rushing off as fast as it otherwise would and thus prevents floods. It maintains a pervious layer of earth into which the water can soak and be stirred up for the summer months, when it is needed for irrigation.

3. "It is for the welfare of the people of this particular region more than that of other localities, that these reserves are created; it is for the settler and homemaker of the adjacent region that the reserves are created and the government spends large sums of money to insure to the home of these homemakers, the benefit of future supplies of timber and water and a protection against flood and drought."

The principal regulations governing forest reserves are as follows:

1. "Agricultural settlement of any kind and under any claim is forbidden.

2. "Timber may be obtained under the free use permit, which entitles settlers and prospectors to use the timber for their own use only. It may also be purchased, but no one is allowed to use the timber without first having obtained permission to do so from the superintendent of the reserve.

3. "Persons desiring to graze stock on the reserves other than pack, riding or team animals, must apply to the supervisor for permission to do so. A permit is also necessary to take a herd of cattle across the reserve.

4. "Persons desiring to erect buildings for occupancy for purposes other than mining must first obtain a permit to do so from either the reserve superintendent or from the secretary of the interior.

5. "Prospecting and mining is permitted anywhere in the reserve but the taking up of land as mining ground does not entitle the prospector to use the same for any other purpose.

6. "Rangers and other forest officers are by law made game wardens within the reserve, and they are required to assist in the enforcement of the local laws in the reserve."

Attention is also called to the law which relates to forest fires. Persons convicted of maliciously firing the forests of the reserve are liable to a maximum fine of \$5,000 and two years' imprisonment or both, and those who are responsible for fires in the reserve through carelessness are liable to a maximum fine of \$1,000 and one year's imprisonment, or both. The law provides that such fines are to go to the school fund in the county in which the offense is committed.

#### Cures Sclerotic.

Rev. W. L. Riley, LL. D., Cuba, N. Y., writes: "After fifteen days of excruciating pain from sciatic rheumatism, under various treatments, I was induced to try Balaia's Snow Liniment, the first application giving me relief, and the second, entire relief. I can give it unqualified recommendation. 25c, 50c and \$1 at J. H. O'Reilly & Co.

#### On a Furlough.

Post Quartermaster Sergeant Joseph West, who is now stationed at Fort Alcatraz, San Francisco harbor, is on a visit to Santa Fe. He has received a furlough for sixty days, and is visiting different places at which he served. He was stationed here several years as regimental quartermaster sergeant of the Tenth United States infantry and served under Capt. V. E. Stottler, who was regimental quartermaster, stationed in Santa Fe for several years. Sergeant West has an honorable record of twenty-five years' service in the regular army. His service in New Mexico

he considers his most pleasant army experience.

#### Pedro Contreras Dead.

Pedro Contreras, aged 80 years and an old timer in these parts, died at his home yesterday in the village of Los Duranes.

The deceased died of old age, and leaves a large family of sons and daughters. He was well known in this city. A. Borders has charge of the remains, and the burial will be in Santa Barbara cemetery.

#### Repulsive Features.

Blackheads, pimples, greasy faces and muddy complexions, which are so common among women, especially girls at a certain age, destroying beauty, disfiguring and making repulsive features which would otherwise appear attractive and refined, indicate that the liver is out of order. An occasional dose of Herbine will cleanse the bowels, regulate the liver and so establish a clear, healthy complexion. See at J. H. O'Reilly & Co.

#### Mill Going Up Fast.

The American Lumber Company's plant is going up fast, and the big force of workmen are hustling things. The main building will be completed by September and by that time it is hoped to have things going in proper shape.

#### The Perfect Liver Medicine.

Mrs. M. A. Jolley, Noble, O. T., writes: "I have used Herbine for a number of years, and can cheerfully recommend it as the most perfect liver medicine, and the greatest blood purifier. It is a medicine of positive merit, and fully accomplishes all that is claimed for it. 'Malaria cannot find a lodgment in the system while the liver is in perfect order, for one of its functions is to prevent the absorption of ever producing poisons. Herbine is a most efficient liver regulator. 50c at J. H. O'Reilly & Co.

#### The Ditch.

Street Commissioner Tierney and a force of men are at work today opening up a ditch down Fourth street.

This will drain the South Fourth street lake of the water. This work will take several days, and it will be fully a week before the secondary ditch can be opened. It will be only a short time now before the water will be gone from sight.

#### WEEKLY CROP BULLETIN.

United States Department of Agriculture, Climate and Crop Bulletin of the Weather Bureau, New Mexico Section.

Santa Fe, New Mexico, June 30, 1903.—Warmer weather, with very light local showers; a very favorable week for growing crops. Corn which has been very backward on account of the drought and cold nights has grown rapidly; wheat, oats, beans and peas look unusually well. The first growth of alfalfa, which has not yet been cut in the more northern counties, has made a very rapid growth since the rains and promises more than the usual yield. In the extreme south the second cutting is about ready to harvest. Wheat harvest has begun in the Mesilla valley. Grass has grown rapidly on the ranges and in all sections there seems to be an abundance of feed assured. Stock has improved rapidly and is now in very good condition. In the northeast it seems that the calf yield will be generally light this year. Sheep shearing has been greatly delayed by the rain of the first twenty days of June. Later advices are that sheep men lost a great many lambs on account of the accompanying cold weather. Apricots, early peaches and apples are ripe in the southern valleys, and being shipped to market. The yield of apricots and peaches is very irregular but the quality is good. Early apricots are ripening in more northern orchards.

The following remarks are extracted from the reports of correspondence: Albert: H. M. Hanson—Frequent showers make the grass come rapidly but impede shearing. Unusually severe hail storm on the 24th, followed by a sudden flooding of local streams which washed away fences and streams and even some grown live stock. Area of hail, and damage caused at other places, not yet ascertained. Sorghum is still being planted, with more than usual being put in this year. Highest temperature, 93; lowest, 52; rain, 0.89.

Andrews: A. S. Andrews—Hot winds, cloudy afternoons. Alfalfa is extra fine. Apricots and plums ripe. Grass is good and stock look very well, but more rain now needed. Arabela: A. M. Richardson—Everything looking very nicely since the drought was broken. Plenty of grass and stock getting fat. Highest temperature, 89; lowest, 49; rain, 0.27.

Aztec: E. C. Condit—First cutting of alfalfa rather short on account of thinning due to winter killing. Rains amounting to 3.60 inches have greatly

benefitted the ranges, and have sent the Animas river out of its banks.

Dorsey: Will C. Barnes—Another fine growing week. Grass growing rapidly and feed is good. Alfalfa is ready to cut on great Maxwell farm. Farmers who lost their spring seed on account of the drought are now planting beans as a crop that offers the best results for a short season. Stock improving but the calf crop generally will be light. Rainfall to date for this month, 8.57 inches.

Folsom: Jackson Tabor—The past week very favorable for the growth of all plant life. Alfalfa has made a remarkable advance and will be above the average notwithstanding the drought. On the range grass was never better at this time of the year. Highest temperature, 80; lowest, 41; rain, 0.86.

Fort Stanton: Ernest W. Halstead—Warm, dry weather; vegetation growing rapidly. First cutting of alfalfa carried on with a rush. Plenty of irrigation water. Grass growing finely. Highest temperature, 87; lowest, 45; no rain.

Laguna: Gus Weiss—No rain since last report, but weather generally cloudy. Very warm with thermometer going to 90 in the shade. Feed on the range is growing rapidly and stock is in good condition. A little rain would be beneficial.

La Luz: Ernest S. Swift—Very hot and dry. Peaches, apricots and apples now ripe for the market. Fruit not so plentiful as usual but is of good size and quality. La Luz river now lower than for some time. Highest temperature, 98.

Las Vegas: Wm. C. Bailey—Highest temperature, 92; lowest, 45; rain, 0.15.

Mesilla Park: R. H. Hart—A hot week. Wheat is being harvested; the second growth of alfalfa about ready to cut. Peaches are being shipped; the yield is good. Highest temperature, 102; lowest, 47; no rain.

Mountainair: John W. Corbett—Warm and pleasant. Soil in good condition and all kinds of vegetation growing well. Highest temperature, 85; lowest, 42; rain, 0.04.

Ojo Caliente: A. Joseph—Excellent growing weather. Alfalfa just harvested is the best crop in many years. Corn, wheat, oats and beans look well and range stock is in good condition. Fruits will yield nearly fifty per cent of a full crop.

Santa Fe: U. S. Weather Bureau—Fine growing weather. Alfalfa about ready to cut and the yield is unusually heavy. Corn now growing rapidly. Oats and wheat fields looking very well. Prairies look green and stock is in very good condition. Some early cherries are ripe but the crop is very thin; late and sour cherries better. Some orchards will have a fair yield of apricots and peaches while others are almost without any. Apples will be very scarce. Irrigation water abundant. Rainfall for June to date, 8.57, or nearly four times the normal. Highest temperature, 89; lowest, 54; rain, 0.02.

R. M. HARLINGE, Section Director.

## JOSE FELIPE MONTOYA

### Held for the Grand Jury Charged With Killing Magdalena Montoya.

#### LUIS ABEYTA DISCHARGED.

Jose Felipe Montoya and Luis Abeyta, the two Indian boys charged with killing Magdalena Montoya at Isleta on the evening of June 24, were brought before Judge Seferino Crockett in the old town court this afternoon.

Both pleaded not guilty. Ladaro Abeyta and Marcelino Joloto testified that Jose Felipe Montoya shot and killed Magdalena with a rifle, and that Luis Abeyta did not have any hand in the matter whatever.

Both the witnesses, Luis Abeyta and the dead boy, were sitting down after the day's work for the railroad company, and were smoking. Felipe threw stones and they chased him. He hit Luis in the head with a club and knocked him senseless, after which he procured a rifle and shot Magdalena dead.

The judge held Felipe for the grand jury without bonds, and discharged Luis.

benefitted the ranges, and have sent the Animas river out of its banks.

Dorsey: Will C. Barnes—Another fine growing week. Grass growing rapidly and feed is good. Alfalfa is ready to cut on great Maxwell farm. Farmers who lost their spring seed on account of the drought are now planting beans as a crop that offers the best results for a short season. Stock improving but the calf crop generally will be light. Rainfall to date for this month, 8.57 inches.

Folsom: Jackson Tabor—The past week very favorable for the growth of all plant life. Alfalfa has made a remarkable advance and will be above the average notwithstanding the drought. On the range grass was never better at this time of the year. Highest temperature, 80; lowest, 41; rain, 0.86.

Fort Stanton: Ernest W. Halstead—Warm, dry weather; vegetation growing rapidly. First cutting of alfalfa carried on with a rush. Plenty of irrigation water. Grass growing finely. Highest temperature, 87; lowest, 45; no rain.

Laguna: Gus Weiss—No rain since last report, but weather generally cloudy. Very warm with thermometer going to 90 in the shade. Feed on the range is growing rapidly and stock is in good condition. A little rain would be beneficial.

La Luz: Ernest S. Swift—Very hot and dry. Peaches, apricots and apples now ripe for the market. Fruit not so plentiful as usual but is of good size and quality. La Luz river now lower than for some time. Highest temperature, 98.

Las Vegas: Wm. C. Bailey—Highest temperature, 92; lowest, 45; rain, 0.15.

Mesilla Park: R. H. Hart—A hot week. Wheat is being harvested; the second growth of alfalfa about ready to cut. Peaches are being shipped; the yield is good. Highest temperature, 102; lowest, 47; no rain.

Mountainair: John W. Corbett—Warm and pleasant. Soil in good condition and all kinds of vegetation growing well. Highest temperature, 85; lowest, 42; rain, 0.04.

Ojo Caliente: A. Joseph—Excellent growing weather. Alfalfa just harvested is the best crop in many years. Corn, wheat, oats and beans look well and range stock is in good condition. Fruits will yield nearly fifty per cent of a full crop.

Santa Fe: U. S. Weather Bureau—Fine growing weather. Alfalfa about ready to cut and the yield is unusually heavy. Corn now growing rapidly. Oats and wheat fields looking very well. Prairies look green and stock is in very good condition. Some early cherries are ripe but the crop is very thin; late and sour cherries better. Some orchards will have a fair yield of apricots and peaches while others are almost without any. Apples will be very scarce. Irrigation water abundant. Rainfall for June to date, 8.57, or nearly four times the normal. Highest temperature, 89; lowest, 54; rain, 0.02.

R. M. HARLINGE, Section Director.

The Sisters Improving. At the St. Joseph's hospital this afternoon Sister Cecilia, who was rendered unconscious Tuesday afternoon as a result of a runaway on Tijeras road was reported a little better, but is not yet out of danger. It is thought she sustained a skull fracture.

Sister Angelica is better, too, and will recover. She has a fracture rib and is severely bruised about the body.
